

HEALTH CARE OUTLOOK

10.25.18

Additional ACPE Information

Educational Objectives

At the conclusion of this activity, the pharmacist will be able to:

1. Discuss the types of activities that could give rise to malpractice and liability associated with certain actions in the practice of pharmacy.
2. Describe how blockchain technologies will impact the practice of pharmacy and the delivery of patient care.
3. List what types of insurance coverage are necessary in the practice of pharmacy and how to insulate oneself with insurance in the face of liability.
4. Describe what types of activities may place the pharmacist/pharmacy in violation of fraud, waste and abuse laws/regulations.
5. Explain recent developments used to curb the opioid epidemic in Illinois and the actions that are being taken to improve management of the epidemic.
6. Outline exceptions to HIPAA use and disclosure restrictions when providing patient care in the pharmacy.
7. Discuss the state of the Illinois Medicaid program and how it is currently impacting pharmacy practice.
8. Discuss labor and employment laws and how to navigate whistleblower complaints.

Continuing Pharmacy Education Requirements

This activity is structured to meet knowledge-based educational needs and acquire factual knowledge. Information in knowledge-type activities is based on evidence as accepted in the literature by the health care professions. Continuing pharmacy education (CPE) credit will be earned based on participation in the activity. Attendance and participation are required before obtaining CPE credit. Any individual who is more than 10 minutes late to an activity or leaves an activity early will not be granted CPE credit. This procedure will be strictly enforced, so please plan accordingly. Participants must complete an activity evaluation and posttest (if applicable) with a passing score of 70 percent or greater.

This activity is accredited through ACPE for pharmacist continuing pharmacy education credit.

If all requirements are met, participants will receive continuing pharmacy education credit in the following manner. Partial credit will not be awarded. Please allow 60 days for processing.

Pharmacists

CPE Monitor, a national, collaborative effort by ACPE and the National Association of Boards of Pharmacy (NABP) to provide an electronic system for pharmacists and technicians to track their completed CPE credits, went into effect on January 1, 2013. IPhA, as an ACPE-accredited provider, is required to report pharmacist CPE credit using this tracking system. Pharmacist participants must provide their NABP e-Profile Identification Number and date of birth (in MMDD format) when they register for a CPE activity or complete activity evaluations. It will be the responsibility of the pharmacist to provide the correct information (i.e., e-Profile Identification Number and Date of birth in MMDD Format). If this information is not provided, NABP and ACPE prohibit IPhA from issuing CPE Credit. Online access to their inventory of completed credits will allow pharmacists to easily monitor their compliance with CPE requirements and print statements of credit. Therefore, IPhA will not provide individual printed statements of credit to pharmacists. For additional information on CPE Monitor, including e-Profile set-up and its impact on pharmacists and pharmacy technicians, go to www.nabp.net.

Universal Program Number: 0135-9999-18-043-L03-P

Contact Hours: 4.5

Initial Release Date: October 25, 2018

Expiration Date: October 25, 2021

The Illinois Pharmacists Association is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education.
